

VACCINATION: **THE POWER TO PROTECT**

Empowering Floridians to immunize is the best way to protect our children from dangerous diseases throughout their lifespans.

Parents make tough choices regarding their children's health and welfare every day. The decision to vaccinate, however, should be an easy one. As a health care provider, patients and parents trust your opinion more than anyone else's when it comes to immunizations. The power to protect is yours.

YOU HAVE THE #VAXFACTS

"B" wise. Always ensure the first dose of Hep B vaccine is administered within 24 hours of birth.

Fight the flu. CDC recommends everyone 6 months of age and older should get a flu vaccine every season.

On time, every time. Sticking to the schedule is the best way to protect

your patients. Check immunization status at every visit and give all needed immunizations simultaneously.

Keep the conversation going. Educate parents and teens about vaccines they need now and throughout their lives. Spending a few minutes to answer any questions or address concerns often is enough to overcome hesitancy.

The message for your patients is clear:

-  **Prioritize Vaccination**
-  **Protect Your Loved Ones**
-  **Pass the Protection On**
